

OUR MISSION

To design and produce an eco-friendly plant tie made entirely from natural materials, offering a sustainable alternative to synthetic and plastic ties.

We are committed to maintaining high quality standards and continuously improving our product based on customer feedback.

Plant Friendly

Anchor Bands® are designed to stretch to accommodate plant growth. Plastic, wire and stocking ties will eventually girdle (strangle) the plant.

Easy to Use

Kind on nature and on the hands. Anchor Bands® are not only soft on the hands and pliable, they can be applied quickly in one simple action.

Biodegradable

Anchor Bands® are biodegradable and will naturally decompose in the environment. There is no need to cut them away from the plants or dispose of.

Beware!

There are many other products that look the same as Anchor Bands®, most are made from synthetic rubbers EPDM and are permanent. They do not break down or stretch and are ecologically and harmful to the environment.

SIZE CHART

SIZE	WIDTH mm	THICKNESS mm	LENGTH LFL mm	QTY PER 1Kg	PURPOSE
8	3.5	1.7	40	1100	Vine Tie Down
9	3	1.5	70	923	Trellis Orchards Tomatoes
10	3	1.5	80	750	Staked Stds
11	3	1.5	100	705	Staked Stds
12	6	2	100	276	Orchards Tomatoes
13	5	2	200	140	Orchards
14	6	2	220	130	Orchards Branch Bending

UV Anchor Band (UV 12) (Customer Size No. 10)

Anchor Bands®

The Original Natural Rubber Plant Ties

Suitable for:

Trellis: Vines, Olives, Cherries, Tomatoes, Kiwi-fruit

Stake Supported Plants: Roses, Lillypillies, Figs etc

Orchards: Branch Bending, Branch Support, Tree Support

Anchor Bands® - the 'Ties that Bind'

TRELLIS

Sizes No 8, 9, 10 & 11

Provides great grip to wire trellis "No Sliding" and stretches to accommodate growth.

In Vines:

- Laying down canes,
- Training to 1st wire via string
- Provides link when short of wire
- Tying to bamboo stakes ensures straight trunks
- Summer canopy tidy-up

UV stabilised natural rubber good for one seasons' use.
Quick to apply & makes pruning time a breeze.

STAKES

All sizes can be used depending on diameter of plant and stake used.

Anchor Bands will not slip down trunk or restrict plant growth.

Standards & Ornamentals:

Roses, Lilipilly, Cumquats - any nursery plants that requires stake support.

Field Grown Tomatoes:

The speed and ease of application is a big plus. Will not shift along support line, even in strong winds.

A reduced UV stability is used for this short term crop.

TREES

This is a very fast and efficient method of training branches.
Greater sunlight exposure results.

Benefits:

- Fixing to tree trunk is quick and easy
- No string to fowl machinery
- No ground fixing devices required
- Greater access around tree for weeding etc.

Loop twice around the branch for a stronger hold
which is ideal in windy conditions.
